## Executive Summary

In 2020, the global economy underwent significant shifts, and the US-China commercial relationship was no exception. Early in the year, the United States and China signed and implemented the Phase One trade agreement and halted tariff escalations for the first time in two years. Last year saw a healthy recovery of goods exports to China, though services exports—the data for which lag a year behind—have fallen for the first time since 2003.

Combined exports of goods and services to China still supported nearly 1 million US jobs in 2019, the most recent year for which data are available.

- **Goods exports to China rebounded in 2020.** US goods exports to China grew by roughly 18 percent, marking a healthy rally from a near-decade low in 2019. Thirty-five states saw growth in goods exports to China, and nine saw growth of over \$1 billion.
- **In 2019, services exports to China fell in most states.** After years of slowing growth, services exports to China fell by 3 percent across the United States, with only eight states registering a positive change. Services exports to China have traditionally been a strong point for US export expansion, registering triple-digit growth over the past decade.
- **China is the United States' third-largest market for goods exports and fourth-largest for services exports.** A healthy rebound of goods exports to China has helped the country maintain its status as the United States' third-largest market despite bilateral tensions. Regarding US services exports, declines in 2019 caused China to slip from the third- to fourth-largest services market, falling just short of Ireland.
- **Exports to China benefit nearly all US states and industries.** China was a top-five goods export destination for 45 states in 2020. The top US goods exports to China are oilseeds and grains, semiconductors and their componentry, oil and gas, and motor vehicles. Many states also generate substantial economic value from service exports like travel, education, and financial services.
- **Tariff exclusions in support of trade commitments helped fuel a recovery in US goods exports to China.** While the United States and China still maintain tariffs on each other's goods, China's tariff exclusion process, which began in March 2020, allowed for a more normal flow of goods from the United States. China established these exclusions to support its Phase One commitments to purchase high volumes of US energy, manufacturing, and agriculture products. While China did not meet its targets, it did significantly increase its goods imports compared to 2019. Absent the removal of tariffs, it is unclear if US exports can maintain momentum over the long term.

**\$123** billion

US goods exports to China, 2020

**\$54** billion

US services exports to China, 2019

# Methodology

This year's edition of the US-China Business Council State Export Report draws on data obtained from The Trade Partnership, an economic research firm. The report provides a breakdown of each US state's goods and services exports to China, and the national export totals include the export data for each state. Goods export figures are primarily based on data from the US Census Bureau, the US Department of Agriculture, and Moody's Analytics. Goods export figures are classified according to the US government's North American Industry Classification System. Services export figures are primarily based on data from the US Bureau of Economic Analysis (BEA) and Moody's Analytics. Services export figures are classified according to BEA categories. This year's edition of the State Export Report uses the same sector categories for goods and services as last year's. Goods exports cover 2011–2020; services exports cover 2010–2019, the most recent year for which detailed data are available from BEA. Because historical data from each of these sources are revised annually, this edition of the State Export Report replaces all prior editions. As in previous editions, this report uses a methodology that credits agricultural exports to states in which crops are grown as opposed to states with large ports where bulk commodities are aggregated prior to export. Average annual growth is calculated with an average annual growth rate formula. A detailed explanation of the methodology for jobs, goods, and services exports estimates is available on The Trade Partnership's [website](#).

# Goods

US Goods Exports to China  
(billions USD)

## *Growth in total US goods exports 2011-2020*

Exports to China: 19.6%  
Exports to Rest of World: -6%

### US goods exports to China experienced a strong recovery last year

In 2019, the United States exported just under \$105 billion in goods to China. Last year, that number jumped to \$123 billion, the second-highest amount in a decade. Oilseeds and grains, oil and gas, and semiconductors and their componentry were all major drivers of growth. In Texas alone, exports of oil and gas to China jumped by \$4 billion. Illinois, Iowa, and Kansas all saw their exports of oilseeds and grains to China increase by around \$1 billion. Additionally, in Oregon, companies sent \$1.8 billion more semiconductors and componentry to China than the year before.

## Growth in US goods exports to China last year significantly outpaced growth in exports to the rest of the world

Exports to China increased by roughly 18 percent in 2020, while exports to the rest of the world fell by 15 percent. The disparity in exports is the result of China's early recovery from the pandemic-induced economic slowdown.

### Top US Goods Exports to China, 2020

1. Oilseeds & grains	\$17.2 billion
2. Semiconductors & components	\$12.0 billion
3. Oil & gas	\$9.2 billion
4. Motor vehicles	\$6.0 billion
5. Nav. & meas. instruments	\$6.0 billion

## Top US Goods Export Markets, 2020

	Market	Total (\$ billion)	Growth (2019–2020)	Avg. Annual Growth (2011–2020)
1.	Canada	\$243.6	-14.0%	-1.0%
2.	Mexico	\$206.1	-17.1%	+1.2%
3.	<b>China</b>	<b>\$123.1</b>	<b>+17.7%</b>	<b>+2.4%</b>
4.	Japan	\$62.6	-13.7%	0.0%
5.	Germany	\$55.1	-3.3%	+1.8%
6.	United Kingdom	\$54.0	-13.4%	+1.0%
7.	South Korea	\$50.3	-9.3%	+2.2%
8.	Netherlands	\$44.1	-11.3%	+1.1%
9.	Brazil	\$34.2	-18.0%	-1.3%
10.	Taiwan	\$29.5	-2.5%	+1.9%

- China remained the United States' third-largest goods export market in 2020.
- The stark contrast between the growth in exports to China and that to the rest of the United States' top trading partners in 2020 can largely be attributed to China's tariff exclusions and early economic recovery post-COVID-19.
- On average, US goods exports to China have been growing by 2.4 percent per year for the last decade, which is faster than the rest of the United States' top goods markets.

# China's Top 5 Goods Import Sources, 2020

China's Top 5 Import Sources (billions USD)  
with Year-on-Year Growth Rates

Source: China Customs

- As in 2019, the European Union (EU), Taiwan, Japan, and South Korea all continued to export more goods to China than the United States in 2020.
- While the EU was the only top import source to see an increase in 2019, it was also the only top import source to see a decrease in 2020. Imports from Taiwan, the United States, and Japan increased 16, 10, and 2 percent, respectively, while imports from South Korea stayed the same.

*Note: Data for this chart are based on PRC government statistics. The value of PRC imports from the United States may differ from US exports to China due to discrepancies between US and PRC trade statistics, methodological differences regarding shipping costs, and tariffs that were applied as goods passed through other customs territories on their way to China.*

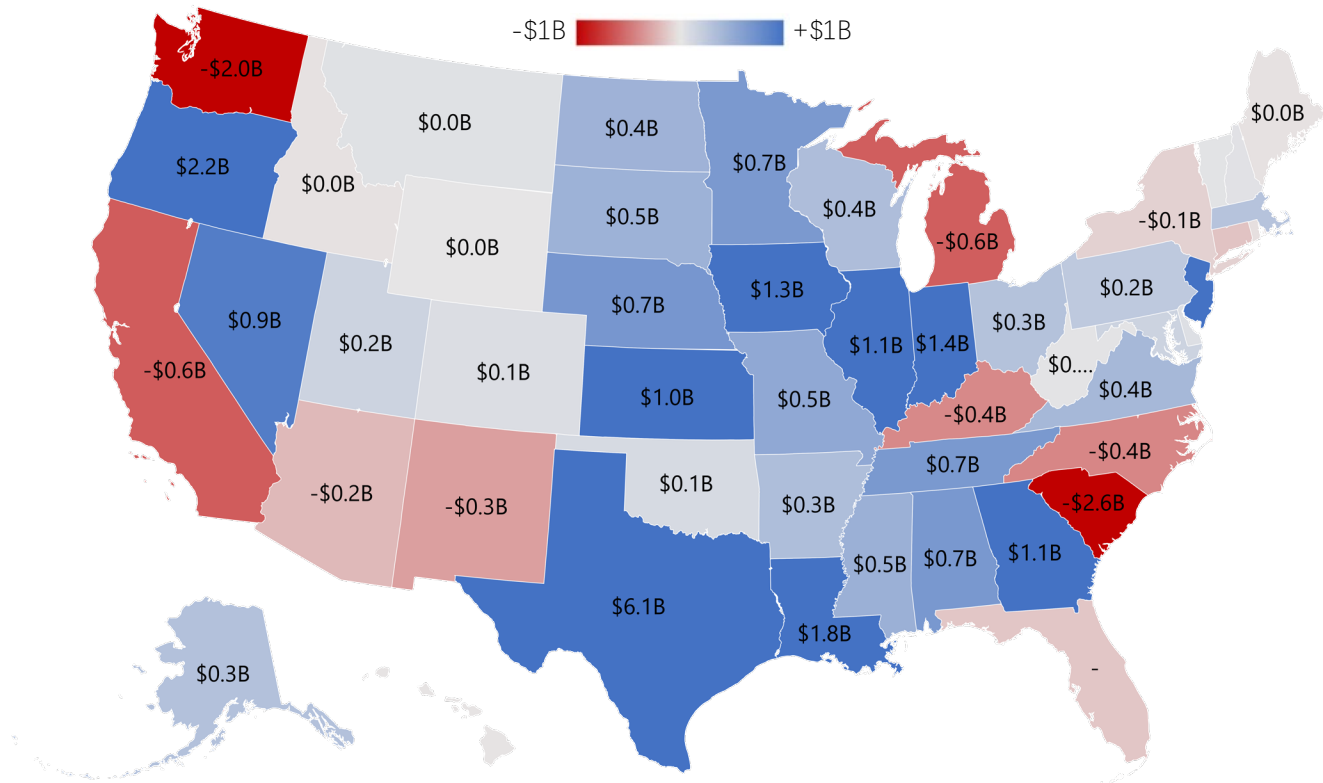

## Top US State Goods Exporters to China, 2020

	State	Exports (\$ billion)	Growth (2019–2020)	Growth (2011–2020)
1.	Texas	\$16.9	+56.0%	+59.6%
2.	California	\$14.8	-3.9%	+5.3%
3.	Oregon	\$9.3	+30.0%	+218.5%
4.	Illinois	\$5.1	+27.5%	+3.4%
5.	Indiana	\$3.9	+57.9%	+88.2%
6.	South Carolina	\$3.9	-39.6%	+29.5%
7.	Minnesota	\$3.5	+23.6%	+18.5%
8.	Georgia	\$3.4	+47.1%	+7.1%
9.	Ohio	\$3.4	+10.1%	+6.3%
10.	Louisiana	\$3.4	+119.9%	+73.4%
11.	New Jersey	\$3.2	+79.5%	+72.3%
12.	Washington	\$3.1	-39.7%	-58.5%
13.	Alabama	\$3.0	+28.8%	+42.0%
14.	Iowa	\$3.0	+73.2%	+36.0%
15.	North Carolina	\$3.0	-12.4%	+6.7%

## Goods Exports Change 2019–2020

Powered by Bing  
© GeoNames

## Most states exported more goods to China in 2020 than in 2019

Of the 35 states that exported more to China in 2020 than the year prior, nine saw exports increase by more than \$1 billion and another 19 saw goods exports increase by more than \$100 million. China was the top goods export market for four states—Alaska, Alabama, South Dakota, and Oregon—in 2020, up from only two in 2019. China was also among the top five markets for 45 states. That said, some states' goods exports to China decreased in 2020, and in some cases, the decrease was significant. Whether a state increased or decreased its goods exports to China largely depended on whether its leading industries aligned with China's tariff exclusion categories and Phase One purchase commitments.

### Oil and gas exports rebounded in Texas (+\$6.1 billion) and Louisiana (+\$1.8 billion)

US states exported over \$18 billion more in goods to China in 2020 than in 2019, and Texas alone accounted for a third of that increase. The significant jump in Texas's exports to China was powered by oil and gas exports—the state shipped around \$6.3 billion in oil and gas products, nearly \$4 billion more than the year before. This jump in fossil fuel sales also helped stimulate an export jump in neighboring Louisiana, where oil and gas exports rose by \$1.7 billion. These sales were driven in part by [significantly higher](#) purchases by Chinese state-owned firms aiming to fulfill purchase commitments under the Phase One trade deal.

## **Semiconductor exports continued to grow in Oregon (+\$2.2 billion)**

Semiconductors are increasingly becoming a focal point of strategic competition between the United States and China, with both countries pursuing policies to ensure access to the chips that are critical to so much of the global economy. Semiconductor exports surged in 2020, particularly from Oregon, where total export growth was powered by a \$1.8 billion increase in semiconductor and componentry exports. Texas and California also saw sizable increases. While these exports support American industry and employment, the surge was likely due to Chinese companies stockpiling chips in response to and in preparation for restrictive US policies that threaten to cut off their access.

## **A recovery in oilseeds, grains, and meat exports helped farmers in agriculture-dominant states**

Last year saw growth in oilseeds and grains exports to China from agriculture-exporting states, such as Illinois, Iowa, Kansas, Minnesota, and Nebraska. The top 10 exporters of oilseeds and grains all saw their exports to China roughly double last year. Exports of processed poultry and pork also helped agricultural states, with meat product exports to China increasing by \$2 billion nationwide in 2020. China's Phase One commitments to purchase agricultural products, combined with lowering its restrictions on imports of certain grains and meat products from the United States, helped US agricultural exports exceed the levels they stood at before the trade war.

## **Washington (-\$2.0 billion) and South Carolina (-\$2.6 billion) were clobbered by falling aircraft sales**

Exports from Washington to China continued to fall last year, driven by the sustained decline of exports of aircraft and parts. In 2020, these exports fell by \$1.7 billion to \$1.1 billion. This represents a huge decrease from 2017, when the state exported more than \$11 billion worth of these goods. Likewise, in South Carolina, a collapse of aircraft exports to China—from around \$3 billion in 2019 to about \$3 million in 2020—rippled throughout the state. At least some of these declines can be attributed to withered demand for aircraft resulting from the collapse of international travel due to COVID-19.

# Services

US Services Exports to China  
(billions USD)

## *Growth in total US services exports 2010-2019*

Exports to China: 161.9%

Exports to Rest of World: 46.1%

### **US services exports to China contracted in 2019, the first time in more than a decade**

Growth in services exports to China has been slowing for several years. In 2019, the most recent full year of data, services exports fell slightly to just over \$54 billion. Contractions in exports of industrial processes and declining numbers of Chinese travelers to the United States for business, pleasure, and education helped fuel the decline. That said, services exports to China have more than doubled over the last decade.

## China was not the only services export market in decline in 2019

Overall, US services exports to the world increased by an anemic 1 percent in 2019, compared to around 5 percent in 2018. Services exports to the United Kingdom and Canada, the top two purchasers of US services, also fell by a margin similar to China's.

### Top US Services Exports to China, 2019

1.	Travel (education)	\$14.0 billion
2.	Travel (other personal)	\$9.4 billion
3.	Industrial processes	\$3.7 billion
4.	Travel (business)	\$3.6 billion
5.	Passenger fares	\$2.3 billion

## Top US Services Export Markets, 2019

	Market	Total (\$ billion)	Growth (2019–2020)	Avg. Annual Growth (2011–2020)
1.	United Kingdom	\$77.8	-2.7%	3.9%
2.	Canada	\$67.1	-1.9%	2.0%
3.	Ireland	\$57.5	+11.7%	9.5%
4.	<b>China</b>	<b>\$54.1</b>	<b>-3.0%</b>	<b>11.6%</b>
5.	Japan	\$49.0	+7.5%	1.5%
6.	Switzerland	\$46.8	+11.9%	8.9%
7.	UK Islands, Caribbean	\$39.8	+3.6%	8.4%
8.	Germany	\$36.3	+1.8%	3.7%
9.	Mexico	\$32.4	-0.6%	3.7%
10.	Brazil	\$24.3	-8.7%	4.0%

- China fell from the United States' third- to fourth-largest services export market, mostly due to nearly 12 percent growth in exports to Ireland, which took the third spot.
- Of the United States' top 10 services export markets in 2019, China had the highest average annual growth rate over the last decade: 11.6 percent. By comparison, the top two markets of the United Kingdom and Canada grew by an average of less than 4 percent over the last 10 years.

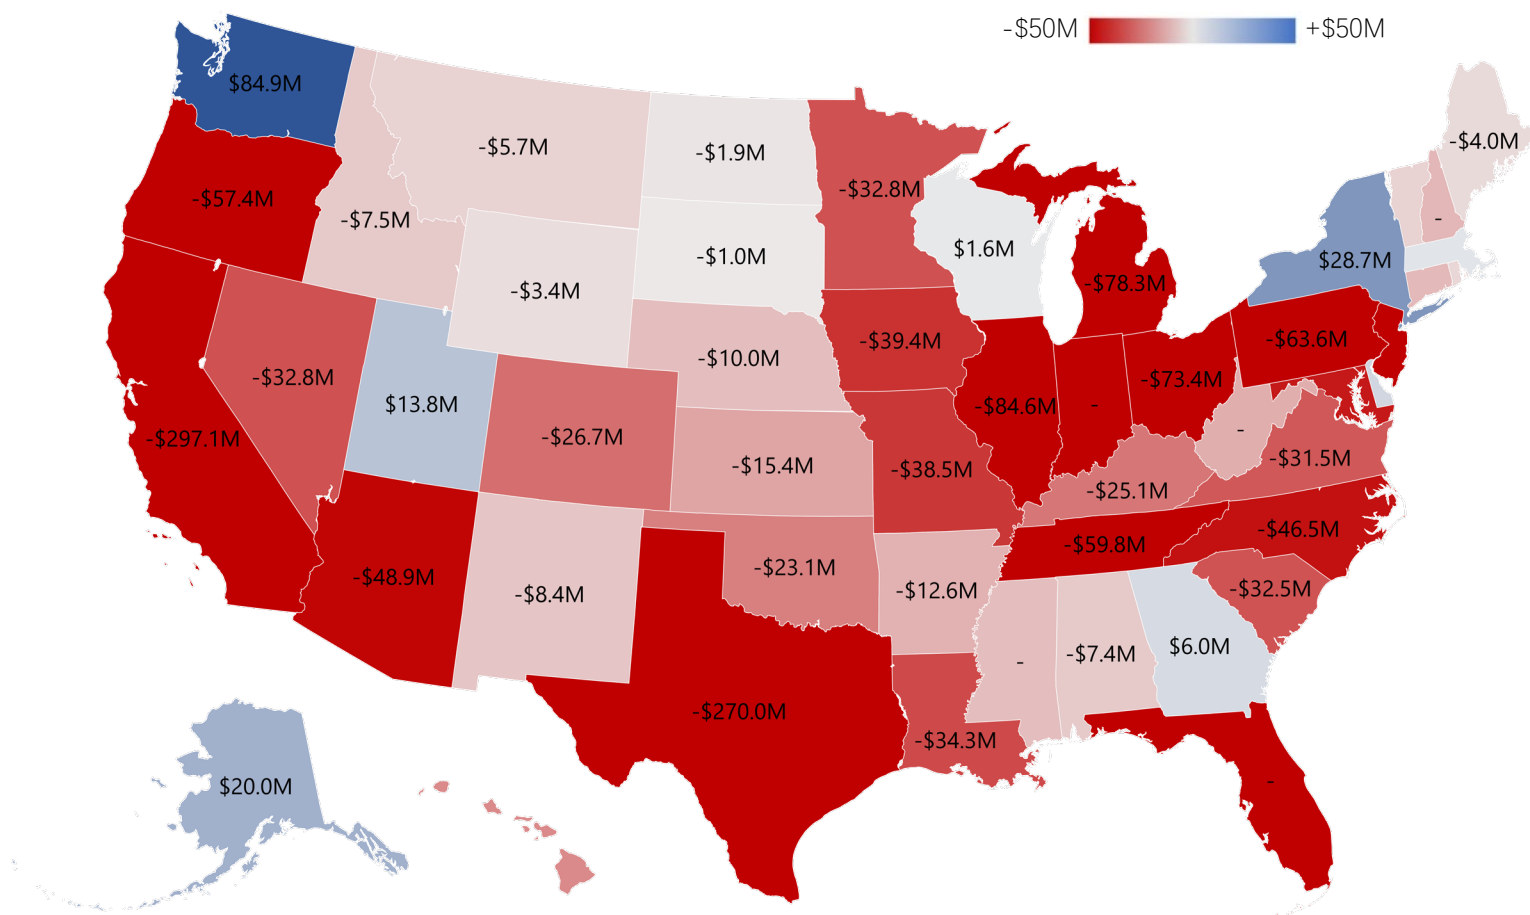

*Note: Full-year services export data are available only through year-end 2019.*

## Top US State Services Exporters to China, 2019

	State	Exports (\$ billion)	Growth (2018–2019)	Growth (2010–2019)
1.	California	\$10.2	-2.8%	175.3%
2.	New York	\$5.9	+0.5%	180.1%
3.	Texas	\$4.0	-6.3%	134.5%
4.	Illinois	\$2.8	-2.9%	165.5%
5.	Florida	\$2.7	-4.7%	168.6%
6.	Massachusetts	\$2.4	+0.1%	204.8%
7.	Washington	\$1.7	+5.2%	127.4%
8.	Georgia	\$1.6	+0.4%	139.2%
9.	Pennsylvania	\$1.6	-3.9%	164.1%
10.	North Carolina	\$1.4	-3.2%	202.9%
11.	Ohio	\$1.4	-5.1%	178.1%
12.	New Jersey	\$1.3	-4.8%	113.3%
13.	Michigan	\$1.1	-6.6%	158.9%
14.	Virginia	\$1.1	-2.8%	124.3%
15.	Arizona	\$1.0	-4.7%	192.2%

## Services Exports Change 2018–2019

Powered by Bing  
© GeoNames

## Digging into the numbers

Viewed from the perspective of the last 10 years, services export growth to China has been strong—all but four states have experienced triple-digit growth since 2010. That said, most states saw year-on-year declines in services exports in 2019. The number of states exporting more than \$1 billion in services to China fell to 14, down one from 2018. While China remains a top-five services market for 44 states, it is the top market for only four states, down from 15 back in 2017. As with goods exports, fluctuations in specific industries can cause sizable changes in a state’s total services exports.

### Travel

Travel consistently represents the top US services export to China. US travel exports account for all the money spent by Chinese visitors in the United States. Several categories fall under the travel umbrella, including business travel, health travel, personal travel, and education travel, which is covered further below. In 2019, business travel fell by around 10 percent to \$3.6 billion and personal

travel declined by a little over 8 percent to \$9.4 billion, possibly due to visa slowdowns and general wariness of traveling to the United States amid bilateral tensions. The 2019 data do not include the COVID-19 pandemic's effects on the travel industry, and it is highly likely that the 2020 data will show that travel exports from US states declined even further that year. One bright spot is health travel exports, which increased by \$27 million in 2019.

## Education

Visiting Chinese students are a significant boost to university revenues across the United States. For three states—California, New York, and Massachusetts—these students represent over \$1 billion in tuition, fees, and local spending. In 2019, exports of education-related travel fell by about 3 percent, or \$422 million, negatively impacting school budgets across the United States. This tracks with [a general decline](#) in international students enrolling at US universities in the 2018–2019 academic year, but it could also be related to increased [scrutiny](#) of Chinese students and [visa restrictions](#).

## Financial services

While travel exports fell in 2019, exports of different types of financial services to China continued to increase. Financial services are the United States' second-highest services export to China. The combined exports of credit-related and other financial services boosted US services exports to China by \$179 million in 2019. New York, the finance capital of the United States, saw its exports of credit-related services to China jump by more than \$22 million. New York's credit-related services exports totaled \$514 million in 2019, more than double the amount of the second-highest exporter of these services, Texas. Not generally thought of as a finance hub, Texas still saw its exports of credit-related services grow by nearly \$12 million. New York's exports of other financial services increased the state's total financial services exports by another \$19.6 million.

# Exports and US Jobs

Exports to China constitute more than cars or computer parts on container ships bound across the ocean—they also represent the livelihoods of thousands of Americans in industries from agriculture to high-tech manufacturing. Estimates of jobs supported by exports to China take both goods and services exports into account; as a result, the most recent job estimates are from 2019. That year, US goods exports to China had fallen for the second year in a row as the United States and China leveled steep tariffs against each other and services exports plateaued. In turn, the number of jobs supported by exports to China fell to 916,000, down from 1.1 million in 2017.

## **The impact of US exports to China on US employment in 2019 varied across states**

Sixteen states saw jobs supported by exports to China increase, while the other 34 saw them decline. Seventeen states saw jobs supported by exports to China fall by more than 1,000, and two states—Texas and Washington—saw a decline of more than 10,000. However, 12 states saw more than 1,000 new jobs added.

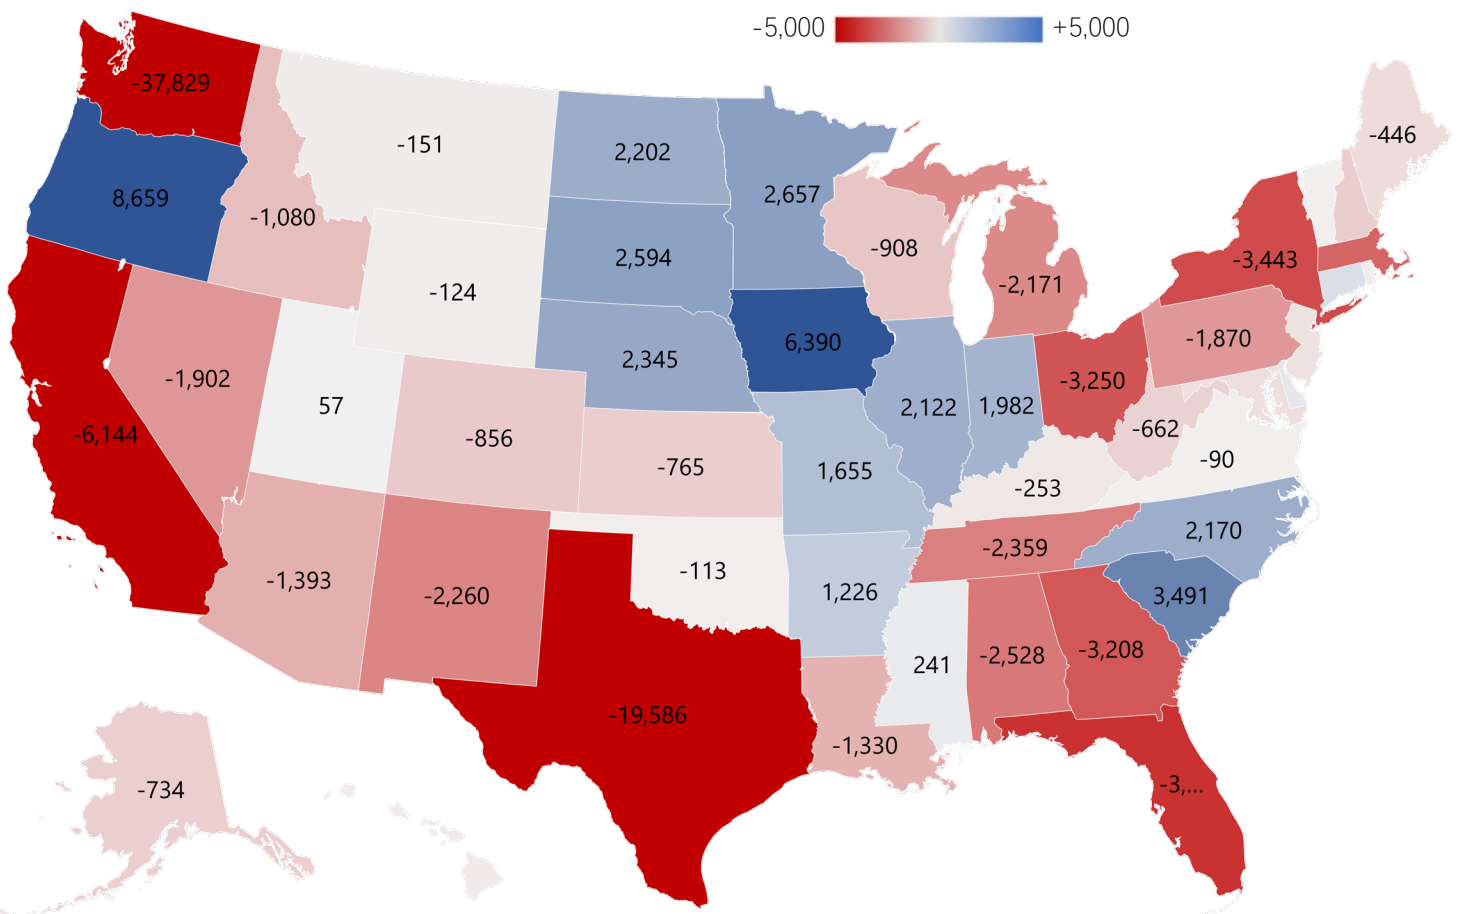

Job losses tended to be tied to fluctuations in specific industry sectors. Take Texas, for example, where the number of jobs supported by exports to China fell by nearly 20,000. In 2019, Texas's goods exports, predominantly driven by oil and gas sales, fell from over \$16 billion to just under \$11 billion. Tariffs on US petroleum products and their impacts on energy prices helped depress the state's exports to China and the jobs that they supported.

In Washington, the situation turned even more grim in 2019. While Washington's exports of motor vehicles and software royalties to China had a strong year, it was not enough to make up for an \$8.7 billion decline in the export of aerospace products and parts to China, which fell by roughly 76 percent from the previous year. Overall, Washington's exports to China fell by \$9 million in 2019, and jobs that had been supported by those exports fell by 38,000.

## Not all the news in 2019 was negative

An increase in exports of oilseeds and grains in 2019 helped boost jobs supported by exports to China in the US heartland, where agricultural exports are a key pillar of the local economy. Illinois, Iowa, Minnesota, Nebraska, and the Dakotas saw exports of oilseeds and grains more than double in 2019 as China made goodwill purchases during trade negotiations. In 2019, these states all saw the number of jobs supported by those exports grow by more than 2,000 each, with Iowa adding around 6,000. Further west, Oregon continued its rapid growth of exports in semiconductors and parts, more than doubling the value of exports in 2019. Along with that expansion of exports came an additional 8,659 jobs across the state.

Jobs Supported by US Exports to China, Change 2018–2019
